PUBLIC NOTICE

Pursuant to the Wyoming Administrative Procedure Act and the Wyoming Public Service Commission's (Commission) Procedural Rules and Special Regulations, notice is hereby given of the Application of Rocky Mountain Power (RMP or the Company) requesting authority to decrease rates to refund deferred Net Power Costs (NPC) under Tariff Schedule 95; and to decrease rates pursuant to Tariff Schedule 93, Renewable Energy Credits (RECs) and Sulfur Dioxide (SO2) emission allowances, as more fully described below:

RMP is a public utility, as defined in W.S. §37-1-101(a)(vi)(C), providing retail electric public utility service under certificates of public convenience and necessity issued by the Commission. RMP is subject to the Commission's jurisdiction pursuant to W.S. §37-2-112.

On April 15, 2021, the Company submitted an Application together with testimony, exhibits and revised tariff sheets requesting authority to revise and change rates pursuant to two different rate schedules: [i] its Energy Cost Adjustment Mechanism (ECAM) Tariff Schedule 95, and, [ii] its REC and SO2 revenue adjustment mechanism (RRA) Tariff Schedule 93.

The total ECAM deferral from calendar year 2020 was a credit of approximately \$1.6 million, which consists of: [i] deferred ECAM costs resulting in a credit of \$2.02 million after the 30 percent sharing band; [ii] a credit for accrued interest of approximately \$0.25 million; [iii] a credit of approximately \$100 thousand from the 2017 ECAM; [iv] a credit of approximately \$0.9 million for the Barclay's Settlement ordered by the Commission in the 2020 ECAM (Docket No. 20000-582-EM-20); and, [v] a charge of approximately \$1.4 million to true-up revenues from the 2019 ECAM (Docket No. 20000-558-EM-19) and the 2020 ECAM. The Company is proposing to revise Tariff Schedule 95 by replacing the current charge to customers approved to recover approximately \$13.3 million (adjusted for load) with rate credits to refund the approximately \$1.6 million, for a total decrease of approximately \$14.9 million.

Under Tariff Schedule 93, the Company is proposing to refund to customers approximately \$1.1 million to account for calendar year 2020 balancing account adjustments and 2021 forecast sales revenues for REC and SO2 products in the market. From the currently approved approximately \$0.9 million sur-credit, this results in a rate decrease of approximately \$166 thousand from current rates.

The combined effect of the 2020 RRA and ECAM in this Application represents an overall proposed rate decrease of approximately \$15.1 million, resulting in individual rate schedule decreases ranging between 0.9% through 2.9%, or an average of approximately 2.4% for all rate classes. RMP requests that the Commission approve the proposed decrease on an interim basis, effective July 1, 2021, subject to further review and hearing.

This is not a complete description of RMP's Application. You may the Application at RMP's Wyoming offices and at the Commission's offices in Cheyenne, Wyoming, during regular business hours or on line at <http://psc.wyo.gov/>.

Anyone desiring to file a public comment, statement, protest, intervention petition or request for a public hearing in this matter must file with the Commission in writing on or before May 20, 2021. Petitions shall

set forth the grounds of the proposed intervention or request for hearing as well as the position and the interest of the petitioner in this proceeding.

If you wish to intervene in this matter and you require reasonable accommodation for a disability, please contact the Commission at (307) 777-7427, or write to the Commission at 2515 Warren Avenue, Suite 300, Cheyenne, Wyoming 82002, to make arrangements. Communications impaired persons may also contact the Commission by accessing Wyoming Relay at 711. Please mention Docket No. 20000-599-EM-21 in your communications.
